Haosheng Huang, haosheng.huang@geo.uzh.ch

Department of Geography

University of Zurich

This document contains the online proceedings of the 13th International Conference on Location-Based Services (LBS 2016), held on November 14–16, 2016 in Vienna, Austria.

The conference was organized by the ICA Commission on Location-Based Services, and the Research Group Cartography at the Vienna University of Technology, with the endorsement of the following organizations: International Cartographic Association (ICA), Association of Geographic Information Laboratories for Europe (AGILE), International Association of Geodesy (IAG), International Federation of Surveyors (FIG), and Deutsche Gesellschaft für Kartographie (DGfK).

Additional papers from this conference were published in:

- Progress in Location-Based Services 2016, Lecture Notes in Geoinformation and Cartography, Georg Gartner and Haosheng Huang (eds.) (2017), Springer-Verlag, Berlin/Heidelberg.

Type setting of the chapters by the authors,
processed by Haosheng Huang.

Think before you print!

ISBN 978-1-907075-02-5

Table of Contents

Section I: Outdoor and Indoor Navigation

Anita Graser

**Recent Advances and Challenges in the Development of
Landmark-based Pedestrian Navigation Systems using OSM 1**

Eva Nuhn and Sabine Timpf

A multidimensional model for personalized landmarks 4

Mahsa Sadat Naseri and Farid Karimipour

Cognitive subdivisions in outdoor navigation 7

Sebastian Feld, Martin Werner and Claudia Linnhoff-Popien

**Criteria for Selecting Small Sets of Alternative Routes in
Constrained Free Space Scenarios 12**

Andrea Kýnová

**Indoor spatial data model for wayfinding: a case study of the
Masaryk University 30**

Anahid Basiri and Pouria Amirianx

**The Usability Analysis for the Use of Augment-ed Reality and
Visual Instructions in Navigation Services 34**

Section II: Positioning

Reinhard Müllner, Thomas Burgess and Heinrich Schmitzberger

FLIP – FLeXible Indoor Position Estimator 44

Guenther Retscher and Julian Joksch

**Comparison of Different Vector Distance Measure Calculation
Variants for Indoor Location Fingerprinting 53**

Mohsen Ahmadkhani and Mohammad Reza Malek
An Improved Indoor Positioning System Based on WLAN 77

Hannes Hofer and Guenther Retscher
Combined Out- and Indoor Navigation with Smart Phones Using Intelligent Check Points 82

Xingyu Zheng, Yi Long, Yong Shi and Yue Xu
A Hidden Markov model for indoor tracking Based on Bluetooth fingerprinting and Grid filtering..... 91

Aleksander Ozga and Günther Retscher
Static Positioning with the Aid of GPS and Cellular Network for Android OS Smartphones 94

Section III: Mobility Analysis

Pia Bereuter and Robert Weibel
Ambulatory Assessment to Study Mobility and Activity Patterns in Healthy Aging Research 124

Kimia Amouzandeh, Farid Karimipour, Seyed Hossein Chavoshi and Havard Tveite
Exploring Spatio-Temporal Patterns in Sport Movement Observations 129

Pilleriine Kamenjuk and Anto Aasa
Passive Mobile Positioning as a Way to Map the Connections Between Change of Residence and Daily Mobility 136

Stefan Van Der Spek, Edward Verbree, Wilko Quak, Ijsbrand D.G. Groeneveld, Raphael Sulzer, Evangelos Theocharous, Magdalini-Styliani Tryfona, Oscar T. Willems and Yueqian Xu
Track-id: Activity Determination based on Wi-Fi Monitoring . 145

Stefan Van Der Spek, Edward Verbree, Martijn Meijers, Fanny Bot, Hiske Braaksmā, Rob Braggāar, Birgit Ligtoet and Bart Staats

In_sight: Using existing WiFi networks to provide information on occupancy and exploitation of educational facilities using at Delft University of Technology. 151

Stefan van der Spek, Edward Verbree, Matthijs Bon, Xander den Duijn, Balazs Dukai, Simon Griffioen, Yuxuan Kang and Martijn Vermeer

A2B: Identifying movement patterns from large-scale Wi-Fi based location data 157

Norbert Brändle, Peter Widhalm, Markus Ray and Magnus Ahlander

Smart Survey – A Turnkey Solution for Automatically Identifying Travel Modes and Trip Purposes of People with Smartphones 163

Yaofei Chang, Chun Liu and De Wang

Exploring Human Mobility Characteristics Based on Floating Car Data and Mobile Phone Records 167

Linfang Ding, Mathias Jahnke, Shirui Wang and Katre Karja

Understanding Spatiotemporal Mobility Patterns related to Transport Hubs from Floating Car Data 175

Andreas Keler and Jukka M. Krisp

Is there a relationship between complicated crossings and frequently visited locations? – A case study with boro taxis and OSM in NYC 186

David Jonietz

Learning Pedestrian Profiles from Movement Trajectories 191

Section IV: VGI, Social Media, and Spatial-Temporal Analysis

Nicholas Bennett, David Millard and David Martin

Narrative Extraction through the Detection and Characterisation of National and Local Events 196

Youngmin Lee, Mikyeong Moon, Inyoung Chae, Kiyun Yu and Jiyoung Kim
Method for Construction of Spatial Sentiment Lexicon using Place Reviews: Case Study on Theme Parks 200

Inyoung Chae, Jiyoung Kim, Youngmin Lee and Kiyun Yu
Analysis of Preference of Tourist Destination using Twitter: Case Study on Theme Park in Seoul, South Korea205

Omid Reza Abbasi and Ali Asghar Alesheikh
Ranking the City: The Role of Location-Based Social Networks in Collective Human Mobility Prediction 209

Hossein Vahidi, Brian Klinkenberg and Wanglin Yan
An Interactive System for Intrinsic Validation of Citizen Science Data for Species Distribution Mapping and Modelling Applications 214

Mayra Zurbaran, Daniele Oxoli, Candan Eyllül Kilsedar, Pedro Mario Wightman and Maria Brovelli
Joining Spatial Visualization Tools with Social Media Data Using Free and Open Source Tools 221

Ying Long
Evaluating cities' vitality and identifying ghost cities in China with emerging geographical data 225

Section V: LBS Applications

Christoph Schlieder and Peter Wullinger
Reducing Location Overhead in Educational Geogames 228

Yuanyuan Wang, Maho Nishizawa, Yukiko Kawai and Kazutoshi Sumiya
Location-based Image Viewing System Synchronized with Video Clips 233

<i>Nasser Tahani, Ali Asghar Alesheikh and Mahdi Farnaghi</i> Development of a Virtual Reality Application based on Libgdx Game Engine in Mobile Environment	239
<i>Christian Hessing and Manfred Buchroithner</i> Development and Implementation of an iBeacon-Based Time Keeping System for Mountain Trails	246
<i>Peter Žličar, Klemen Kozmus Trajkovski and Dusan Petrovic</i> Android application to guide users through Slovenian hiking trails	254
<i>Martina Joisten, Oliver Ullrich and Katharina Hoven</i> GeoReal: Location-based Services for Real Estate Agents in Florida	257
<i>Jong Hyeon Yang, Jung Ok Kim and Kiyun Yu</i> A Proposal for Construction of a Floor Noise Map Using Web Scraping	260
<i>Abouzar Ramezani and Mohammad Reza Malek</i> A Spatial Model against Air based Terrorist Attacks	263
<i>Mahmoud Reza Delavar, Sanaz Azimi, S.Ali Hosseinpour and Amin Gholami</i> A Multi-Agent Rescue Operation in a LBS Environment	268
<i>Abouzar Ramezani and Mohammad Reza Malek</i> Improving the Performance of Airport Service Cars Using Mobile GIS	286
